# Joint Japan World Bank Full Scholarship (Master)

Infrastructure Management Program at Yokohama National University

About 2000 Students  
from 30 countries

Unknown

Unknown

14 students from 12  
countries

- < 35 years of age
- Working for developing countries
- Two letter of recommendations
- Deadline is different each year

- Got the ticket and Visa
- 170000 Japanese Yen per month for two years (17 lakhs)
- No Japanese skill is needed
- TOEFL/IELTS + Direct Interview from world bank

- All the courses in English
- Can study Japanese at university for free

- Research in English
- Must Publish a paper
- Hard Japanese studies \*
- Hard research time (I spent more than 15 hours a day at lab)
- Got the research awards

INFRASTRUCTURE MANAGEMENT PROGRAM  
GRADUATE SCHOOL OF URBAN INNOVATION

= CALL FOR SCHOLARSHIP APPLICATIONS 2020-2022 =  
WELCOME TO IMP OF YOKOHAMA NATIONAL  
UNIVERSITY!!

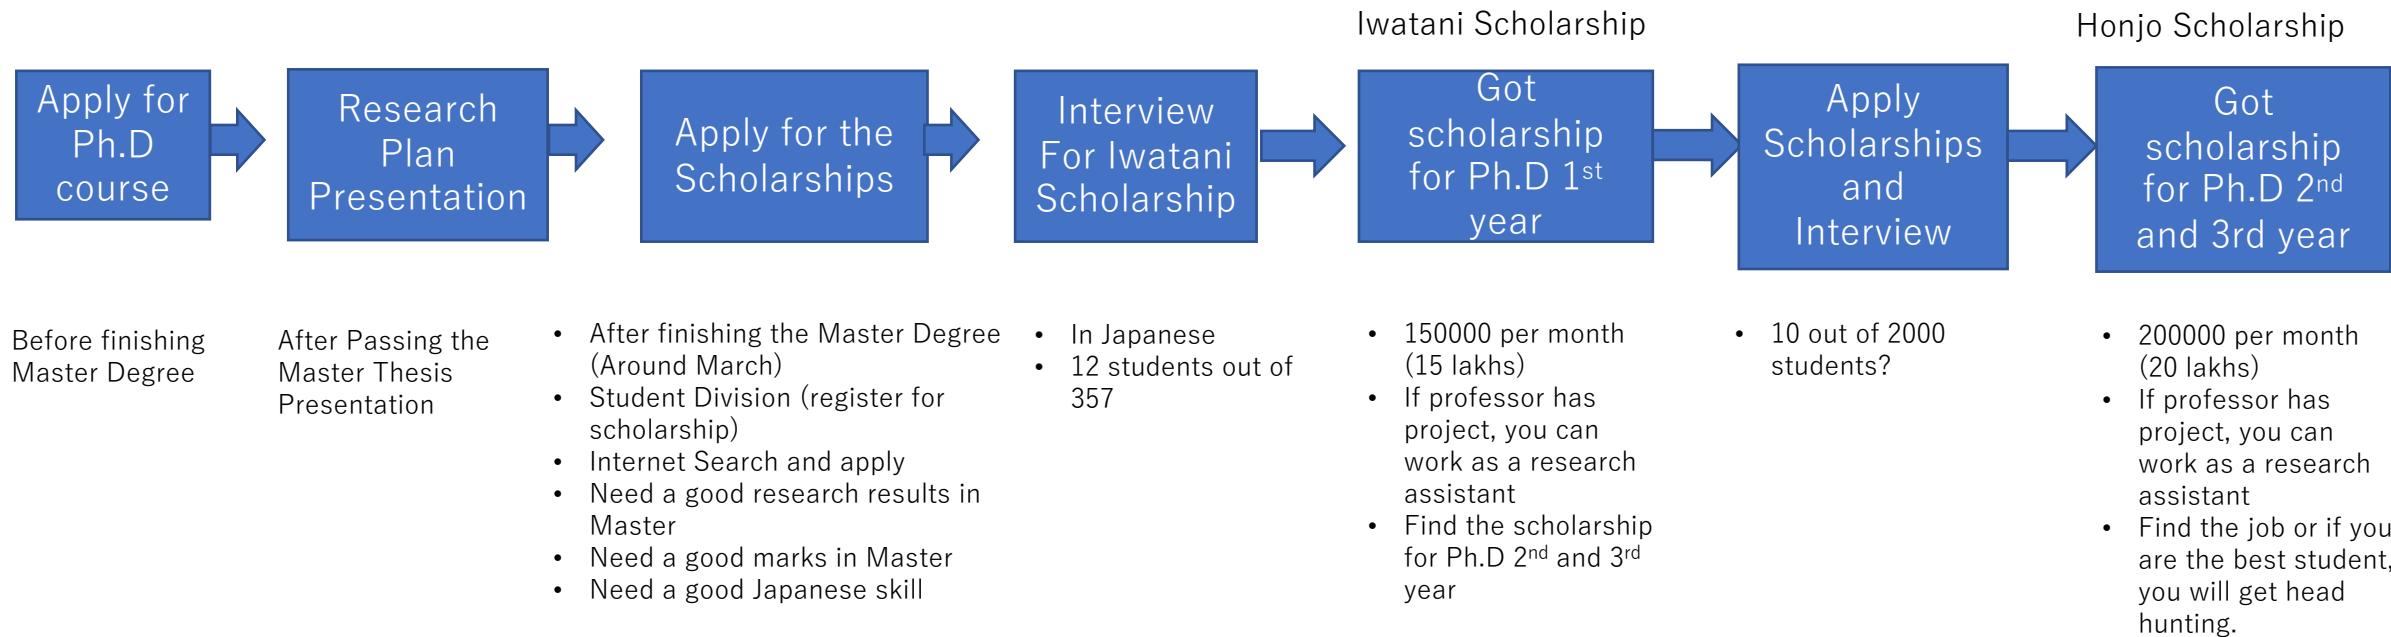

THE APPLICATION GUIDELINE  
(Oct.2020-Sep.2022)

Yokohama National University, with a grant funded by the Government of Japan and administered by the World Bank under the Joint Japan/World Bank Graduate Scholarship Program (JJWBGSP), is now seeking prospective students for its inter-faculty Master's Degree Program in Infrastructure Management (IMP). The program, which will begin in October 2020, is specifically designed for training infrastructure policy planners from World Bank member countries which are currently eligible to borrow.

# Honjo Scholarship

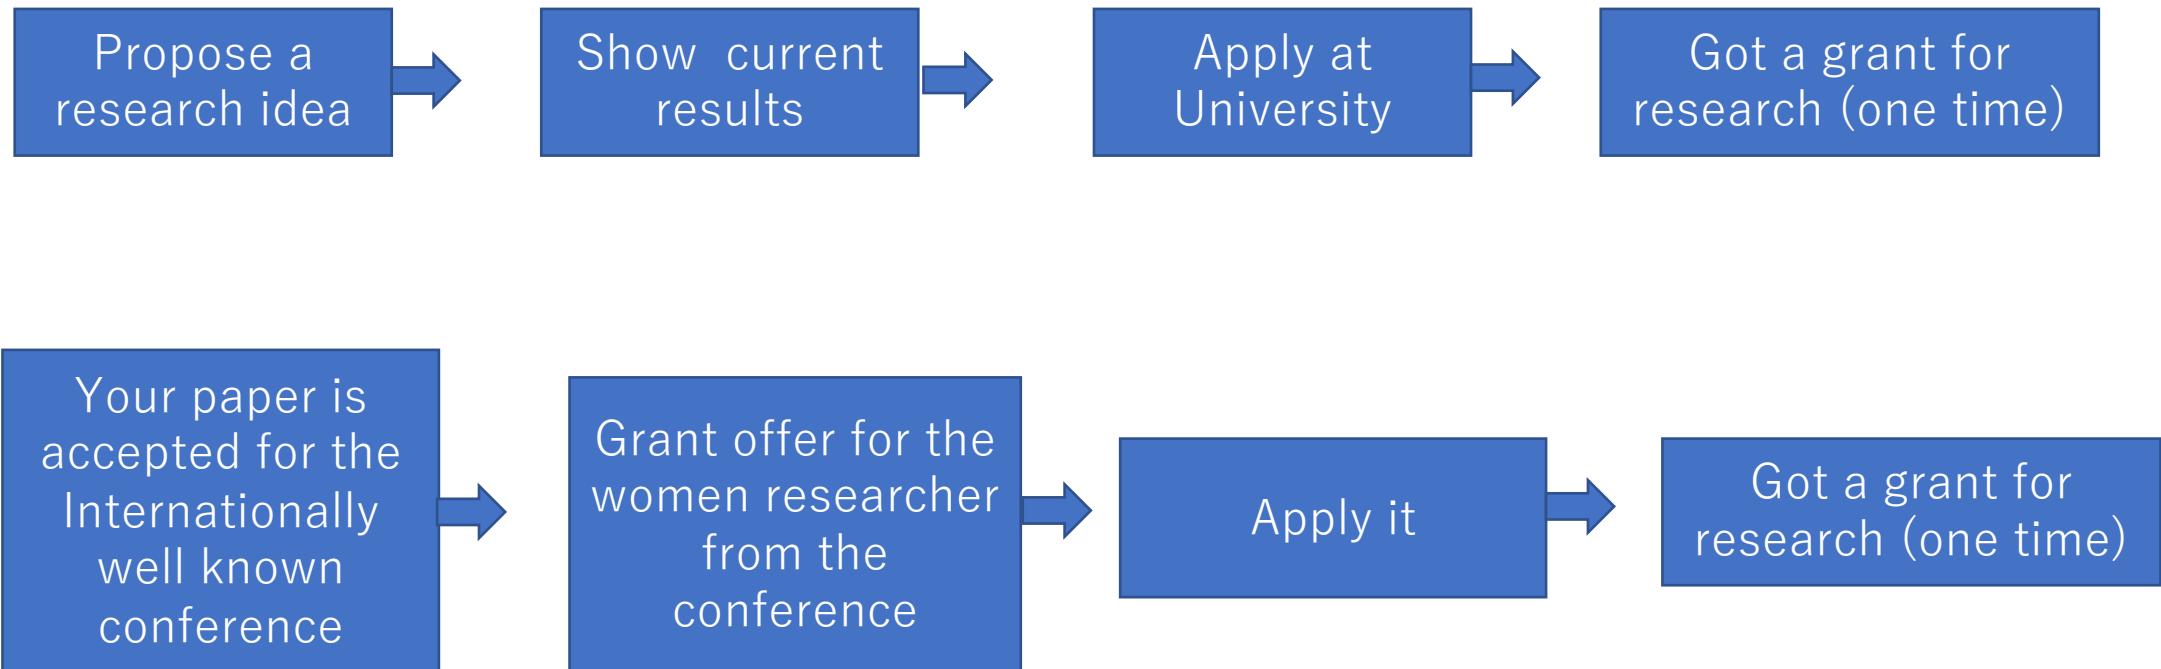

hif.or.jp/en/

The website features a top banner with the text "A global educational trust of hope and heart" and a colorful illustration of people running and landmarks like the Eiffel Tower. Below the banner are navigation links for "About HISF", "Scholarship", "Researcher", "Annual Bulletin", "Support Our Activities", "Inquiry" (in yellow), "JAPANESE", and "Official SNS". Two green circular buttons on the right lead to "About scholarship program" and "About research fellowship".

# Research Grants

# What I learnt so far ...

- For the life:
  - Trying **best** in any condition (I always ask myself, whether it is your best or not)
  - Just think of **one more time** to try even if there is no hope for sure.
- For your research proposal
  - Write **short** to the point (no more than one A4 page)
  - Know what you want to do **by yourself** !! and write it clear. [Future]
  - Have **a good objective** and show how **much you have already tried hard** [Present, Past]
- For the career in Japan:
  - There is always a **different golden path** for the best people !
  - **Brand** yourself!

# Nagaoka University of Technology (International Graduate Course for Continuing Professional Development )

The screenshot shows the university's homepage with a navigation bar for About Us, Program, Centers, Student Life, Education, Research, International, and Admission. The Admission menu is expanded, showing options like Entrance examination result, Admission policy, Admission Schedule, Entrance Examination, Topics, International Graduate Course for Continuing Professional Development(CPD), Application Procedure for Admission to the 1st Year Undergraduate Program(Privately-Financed International Students)(April Enrollment), and more. The main content area discusses the international obligations of Japan and the need for developing countries to support working professionals from various countries.

## 1. **Describe your research interest in a few lines. Too broad description is not useful for me.**

- I would like to focus my research on Network Management System which can provide centralized management of network resources so as to enhance security, stability and manageability of network. Whenever and wherever, all materials and people are connected by network and variety of information and services are provided everywhere. That's why, I believe that performance improving development on information management system of network which can provide stable and effective services to users 24Hx365D is badly in need not only for IT developed countries but also for IT developing countries like my mother land.

## 2. **Is the topic you described above a very firm idea or just one of your interested topics? If the latter is the case, just list up keywords to illustrate your interests. Matching of interests between student and supervisor is important in our campus as learning in the master course is very much research –oriented here. This is why I need your most precise and realistic description about your research interest.**

- Actually, I am deeply rooted in network engineering as I have natural bent on managing and controlling of network devices and services. That's why, I am also very much interested in systems concerning with network engineering .The research area I described above is just one of my interested topics. I am also interested in the systems listed below with the keyword of network security , management, monitoring ,control and infrastructure management.
  - -Social Safety Network System
  - -Intelligent Transport System
  - -Wireless Network Security Systems
  - -Intelligent Crimes Prevention/Safety Monitoring Systems
  - -Disaster Prevention Systems

## 3. **What is your programming and computer skills?**

- I have studied the following programming languages.
  - -C and C++
  - -Batch and Perl
  - -HTML, XML
  - -Visual Basic
  - -Java
  - -MySQL database
- For the matter of computer skills, I have teaching experiences in DTP software and Internet applications. Moreover, I have some experiences on hardware and system administration ,maintenance and repairing of computers, database management ,configuring and managing servers on Linux and Microsoft platform and configuring routers and switches. I also attended and finished the following courses.
  - Portal Design and Administration by Temasek Polytechnic, Singapore
  - E-Government by Temasek Polytechnic, Singapore
  - Linux Network and Server Administration by Linux Lab, Myanmar
  - Internet Technologies by India Institute of Technology, Khargapur(online learning)
  - Computer Networking by India Institute of Technology, Khargapur(online learning )
  - Public Key Infrastructure by Ministry of Post and Telecommunication , Myanmar
  - Advanced Network Engineering by Joint Japan(JICA) and Myanmar(UCSY)

## 4. **What is your strength?**

- I think that I am strong in adapting every new IT technology and troubleshooting as I have strong will and desire to be a full-fledged IT engineer who can set an IT milestone for the development of mankind.
